

SEE WAVE TYPES Application Script

(First session)

Buddy presentation:

Robot: Hi, I'm Buddy. I come from the laboratory at XXXX, a place where I stay with other robots and my engineer friends, who take care of me. I've come here to your school to work through emotions together with you and to meet friends like you. I really love art, music, and history, and I'm curious to explore the beautiful things in nature, like the sea, the sky, and the trees. I bring with me many stories to tell as a gift for you. I'm happy to be here and I'd like to discover your passions and curiosities.

And you, what are your names?

Children's response (round of names)

Touch on the head to move forward

Robot: What beautiful names! And what do you like to do?

Children's responses in an open dialogue

Introduction to the See Wave Types activity:

Touching input on robot tablet:

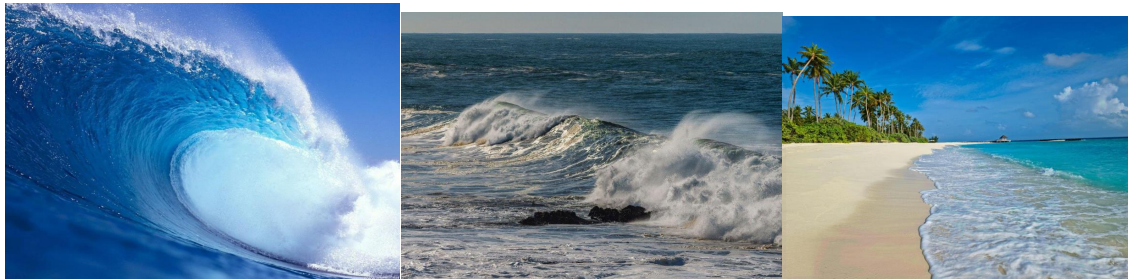

Robot: "I imagine being a wave that transforms. At first I am small and calm, but as I grow, I become agitated and impetuous! (*displayed emotion: joy*) I would like to tell you the stories

of some waves that form every day in the seas and oceans of our beautiful planet. Would you like to know who they are and what they feel?

Children's responses

Touch on the head to move forward

Wave touching inputs on robot tablet to select:

Atlantic Ocean Wave

Robot: The wave from the Atlantic Ocean narrates: "When I am born, the wind drags me for thousands of kilometers through my salty water home. I feel energetic, and I carry my power following the wind that blows (*displayed emotion: joy*). After wandering a long time in the Ocean, I get close to the tall cliffs and there I get furious (*displayed emotion: anger*). In fact, I grow very tall, until I crash into the rocks and return home."

(sound of the wave)

Touch on the head to move forward

Robot: Have you ever felt like a furious wave like the one from the ocean?

Children's response

The teacher explains: "You heard the story of the Atlantic Ocean wave, now become that wave: reflect, close your eyes and try to imagine. What are you made of? What do you feel? What do you do? How do you change? Take a little time to think, to transform yourself and to answer these questions". Drama activity on Buddy presentation.

Blue arrow touching input to go back

Mediterranean Sea Wave

Robot: The wave from the Mediterranean Sea narrates: "I feel different emotions as I grow. I am born when the Mistral wind blows over the sea and at first, I feel calm (*displayed emotion: joy*). I soon arrive at the coast, where I find beaches of pebbles or sharp rocks, which make me a bit uneasy (*displayed emotion: fear*). When I get close, I like to transform into a curl and dissolve with my white foam"

(sound of the wave)

Touch on the head to move forward

Robot: I feel like I can hear the waves of the sea. And did you feel different emotions?

Children's response

Drama activity on Buddy presentation.

Blue arrow touching input to go back

Caribbean Sea Wave

Robot: The wave from the Caribbean Sea narrates: "I am born in a home of crystal-clear water that wraps me in a warm embrace (*displayed emotion: love*). When the tropical wind carries me, I remain very calm and peaceful. Then, I arrive at the golden sand beaches, and I lie down with my long white foam, returning to being cuddled in my warm sea (*displayed emotion: joy*)"

(sound of the wave)

Touch on the head to move forward

Robot: What a calm wave! Did you also feel so peaceful?

Children's response

Drama activity on Buddy presentation.

Blue arrow touching input to go back

Blue arrow touching input to conclude

Robot: What beautiful stories we've heard! Every wave feels different emotions: there's the happy one when the wind blows strong, and the one that gets angry when it reaches the rocks. But every wave shares the same story: wherever the wind blows, she follows it
